

Uncertainty Ahead Means Instability Now

Why Families, Children, Educators, Businesses, and States Need Congress to Fund Child Care

December 2022

SOUTH CAROLINA

The problems are clear: Families can't find or afford child care because compensation is too low to attract and retain early childhood educators. As federal relief dollars that have saved the sector from complete collapse begin to dry up, the stability those dollars brought to programs will disappear with the funding.

The solutions are clear: The public benefits from public investments in child care and early learning. Congress needs to build on the successes of child care funding to prioritize additional, sustainable investments that ensure programs and educators can meet the needs of families, children, and businesses, and states can continue to build towards an early childhood education system that works.

In October 2022, more than 12,000 early childhood educators from all states and settings—including faith-based programs, family child care homes, Head Starts, and child care centers—responded to a new ECE field survey from the National Association for the Education of Young Children (NAEYC). The results of this survey continue to show that relief helped, but uncertainty about the future is impacting the present.

Here are some reflections from survey respondents in South Carolina:

"We used grant money to upgrade our playgrounds. We now spend more time outside and it's great for the kids. We are able to host social events so our community relationships can strengthen. Going through these hardships we have lost a lot of teachers but the core group is strong and really awesome. We have also been able to provide more experiences to the kiddos, which helps them grow and we have been able to update our classrooms so the environment is safe and encourages development."—Program Director/Administrator

"I worry about the effects that the end of stabilization grants may have on the classroom or the students that are dependent upon them."—Early childhood educator

"With aid, the program tends to stabilize, and if aid is terminated, stability may be disrupted."—Early childhood educator

"I am concerned about being able to retain my current staff. They are working so much overtime due to staffing shortages, and I have been able to give them bonuses from the stabilization grant."—Program Director/Administrator

Here's a brief summary of the survey data from South Carolina:

	SOUTH CAROLINA	NATIONAL
Sample Size	81	12,897
Child Care Center	33.3%	47.7%
Family Child Care	7.4%	18.6%
STABILIZATION GRANTS¹		
Child care directors/administrators who report receiving grants	73.1%	73.9%
Family child care owner/operators who report receiving grants	80.0%	85.7%
Total reporting that their program would have closed without grants	32.5%	34.0%
Total reporting that they believe their last payment will be in 2023	61.3%	61.0%
When stabilization grants end:		
Child care center directors saying their programs will have to raise tuition	57.9%	42.8%
Total reporting their programs will have to cut wages or be unable to sustain wage/salary increases	37.5%	23.0%
STAFFING AND SUPPLY		
Current Challenges		
Child care center directors reporting they are serving fewer children than they would like to serve	34.6%	46.4%
Most common reason they are under-enrolled?	Not enough staff	Not enough staff
Total reporting that their program is currently experiencing a staffing shortage	49.4%	67.0%
Among respondents in programs with a staffing shortage:		
› Reporting they are serving fewer children	47.5%	45.4%
› Reporting a longer waitlist	45.0%	37.4%
Future Challenges		
Total indicating “yes” or “maybe” to considering leaving their job or closing their family child care home	25.9%	29.2%
› Family child care providers considering leaving	20.0%	36.4%
Number one thing needed to stay	Competitive wages	Competitive wages
ECE WORKFORCE WELL-BEING		
Total respondents experiencing financial insecurity in the last year	29.6%	29.5%
Total respondents who received more money from a wage increase or supplement in the last year	51.9%	49.4%
Total indicating that burnout/exhaustion are “greatly” or “to some extent” contributing to problems retaining teachers	72.8%	78.0%

1. For more state-level information about the receipt of stability grants, please see ACF's state profiles. According to the profile for South Carolina, providers in 98% of South Carolina's counties received funds as of 6/30/22. https://www.acf.hhs.gov/sites/default/files/documents/occ/South_Carolina_ARP_Child_Care_Stabilization_FactSheet.pdf

Methodology This online survey, created and conducted by NAEYC using SurveyMonkey, represents the responses of a non-randomized sample of 13,037 individuals working in early childhood education settings who completed the survey in English or Spanish between October 5-23, 2022. To generate a more representative national sample from the pool of responses, a probability proportional to size (PPS) methodology was used to pull samples by state that are benchmarked to the share of the total early childhood workforce by state. These shares were calculated by the authors from the Bureau of Labor Statistics May 2021 Occupational Employment and Wage Statistics (Codes: 11-9031, 25-2011, 25-2051, 39-9011). The final sample size for the national-level analysis is 12,897. In contrast, for the state-level analysis, the entire sample of responses from each state were used. We are unable to supply detailed analysis in states for which there are very small sample sizes across sub-groups. Respondents were asked to select any setting that applied to them. They could choose from the following list: child care center, family child care home, non-profit, for-profit, school-based, Head Start, faith-based, multi-site. For this brief, only the percentages for child care center and family child care are reported.

The survey links were shared widely through email newsletters, listservs, social media, and via partnerships, and 10 randomly selected respondents were provided with a \$100 gift card for participation in a sweepstakes. Given the constantly changing and widely varying nature of the crisis, the broad analysis from this survey is intended to present the experiences of the respondents, as captured in the moment that they take the survey, with extrapolations for the experiences of the field and industry at large.
